

# LARGE DOUBLE END RETRACTOR

## Large Double Ended Retractor

- A new, innovative design that allows unrestricted access to the anterior and posterior regions while taking intra oral photographs
- Built in angulations provide superior photo access without the aid of an assistant
- Two sizes on each end will fit most adult patients, with little or no discomfort
- Compliments the Pedro double ended retractor currently available from Glenroe
- Available in cold sterilizable, autoclavable, and heat sterilizable variations; 2 per pack
