

ORTHO-LIPGUARD™

"It was very simple to use. Not only was it easy to mold, but it was easy to put in my mouth and remove. It was very comfortable and helped prevent any damage done to my mouth from braces. The best part, when I got my braces tightened, all I had to do was re-mold it to fit my teeth again. I loved using the Ortho-LipGuard and would definitely use it again."

-Stacey Peterman, High School Student and flute player

Ortho-LipGuard™

- Provides temporary relief of direct pressure to the lips caused by Orthodontic appliances
- Applications include playing instruments and non contact sports
- Consists of a strip of medical grade plastic material that can be heated and formed to the contours of the patients mouth, creating a custom guard for each application
- The strip can be re-heated and formed throughout orthodontic treatment, to compensate for moving teeth
- 10 strips per bag
